Pipex px® design and manufacture bespoke structural liners in a variety of advanced thermoplastic materials including Polypropylene (PP-H), High Density Polyethylene (HDPE) and Polyvinylidene Difluoride (PVDF).

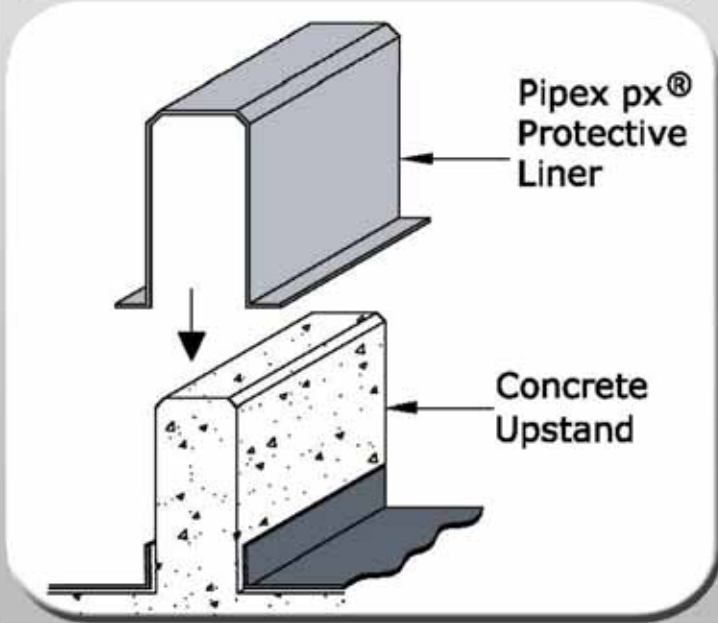

Advantages of Pipex px® Structural Liners include;

- High corrosion resistance - Chemical Resistance tables available upon request
- Offsite pre-fabrication for enabling fast track installation
- Bespoke manufacture to suit project specific requirements
- PE Blue potable water liners certified to DVGW W270
- Able to be pressure jetted to WRc standard

Exposed concrete prior to Pipex px® protective liner
