Pipex px® Phenolic FRP Structures signify a major innovation for markets demanding a high degree of fire safety.

Compared to typical polyester, vinylester or epoxy FRP products, Pipex px® phenolic structures offer a substantial advancement in fire integrity and performance. Combined with low toxicity and low thermal conductivity, Pipex px® phenolic FRP provides a new level of functionality.

- Higher Structural integrity at elevated temperatures
- Low combustibility
- Low smoke & toxic fume emissions
- Duragrid® Phenolic meets US Coast Guard PFM 2-98 Fire Integrity L2

UK Sole Distributor

Pipex px® Phenolic grating has been used to reduce weight & maintenance on offshore oil platforms for more than 16 years.

Offshore working platform constructed using lightweight & corrosion resistant Pipex px® Duragrid® phenolic grating.

Durable & Corrosion Resistant

Superior Fire Integrity

Lightweight

Impact Resistant

Easy to Install

Virtually Maintenance Free

Strong

Low Electrical & Thermal Conductivity
