Scope of Work

Pipex px[®] supplied, fabricated, delivered and installed 14 No. GRE PP-H (polypropylene) manholes with HDPE (high density polyethylene) shuttering and associated pipe work for the new Brewery House in Malta.

The PP-H manholes were supplied in measurements of;

- 11 No. 1050mmø
- 1 No. 900mmø
- 2 No. 600mmø

The height of the manholes range from 600mm to 1200mm.

Additional Information

Associated pipe work for the Brewery House consists of;

- 4" to 8" floor drains
- 4" to 8" bends
- 8 No. 9" reducing branches
- 4" to 10" polypropylene pipe for manhole connections

Unique Selling Point

- Light weight & durable
- Design life expectancy of 60+ years dependant on application
- Pre-fabricated offsite to enable fast track installation
- Low maintenance & fire resistant
- Corrosion resistant

Services

- Technical sales solutions
- Procurement
- Design & engineering
- Project management
- Fabrication
- Testing, commissioning & maintenance

Pipex Future Thinking

Pipex px[®] are wholly and demonstrably committed in our business operations to the protection of the natural and built environment locally, nationally and globally. Pipex px[®] provide a range of high quality and environmentally safe construction products and services.
